

SOUTH AFRICA IS A NATION which is layered with problems arising from its controversial past. However, it is still a nation which is filled with opportunities, diversity and pride.

Amongst the issues the nation faces, Education stands out. In order for the nation to progress, the nation's youth need to receive the necessary tools provided only through education.

Nelson Mandela addressing the Madison Park High School in Boston, USA in June 1990 stated - "*Education is the most powerful weapon which you can use to change the world*".

Alan Levy Attorneys Notaries and Conveyancers has launched the ALA EDU TRUST to assist in the battle to address the educational issues in South Africa, thereby developing passionate leaders for tomorrow.

Alan Levy Attorneys are **COMMITTED TO MAKING A DIFFERENCE** and on having a positive impact on the young leaders of our nation.

Education is capable of transforming lives and providing opportunities to all. More importantly education provides the means to break the cycle of poverty and lack of skills in families and communities around South Africa.

The ALA EDU TRUST is geared towards helping those who are less fortunate and who are unable to fund their tuition fees.

Combined with collective contributions, ALA is confident that it can effectively reach the nation's youth and as a collective make a significant difference in the future of the country, **WE CALL HOME!**
